How To Use Our Advanced QR Code Catalog System

Scan This Code
For The Latest
Promotion

1. Within this catalog, find the products you would like to purchase
2. Scanning the code next to product name will take you to online shopping cart
3. Add the quantity of product to your cart
4. Scan code for another product, continue until complete
5. Select payment and shipment method
6. Receive product at your shop!

ULTIMATE CLEAN UP CARDS

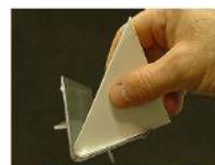

A disposable ink cleaning tool for screen-printers

Clean Screens
Clean more ink faster.
Less ink means less waste.
Workers are back printing sooner.

Clean Squeegees
Quickly wipes ink from squeegees.
Will not scratch rubber.

Clean Scoop-coaters
Fold card diagonally in half to clean coaters.
Saves time and expensive materials.

Strong
Strong enough to scoop thick ink.
Great for scraping dry pigments.

Apply Adhesive
Great for spreading gel ink adhesive.
No sticky tools to clean.

Apply Block-Out
Spreads Block-out quickly and easily.
Dispose of card when finished.

Convenient Online Ordering

Fast Delivery To Your Shop

NORDIC

Cotton White Ink

Available In

An easy printing opaque white resulting in excellent coverage on darker garments. Low tack formula allows printing through finer mesh counts without the need for any viscosity modifier. Use as an underlay where good opacity is needed or as a truly great stand-alone white.

Features

- Economical, high performance white for 100% Cotton.
- Creamy, short body plastisol for easy printing.
- Low tack formula for fast shear action.
- Formulated as a Non-phthalate product
- Great opacity with quick flash.
- Low hot tack does not need a cool down station.
- Will not cause *ghost on 100% cotton.

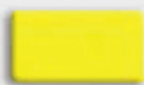

Application

Print Cotton White straight from the container through mesh ranging from 86 to 230 mc in (34 to 90 mc cm) without modification of the viscosity. The tack free formulation allows increased coverage; therefore use finer mesh counts for the softest hand and good opacity.

KOLB Xtra Opaque Low-Bleed inks are high-opacity, multi-purpose inks that are designed to produce extremely opaque prints, yet are very easy to print on a manual press. The smooth, creamy consistency leaves an even, uniform print on white flash bases and can be opaque on black without a white surface, and contain clean, bright pigments. The fast flash speed allows for shorter dwell times and faster production output.

WOW is a high-opacity, low build-up ink line, designed specifically for wet-on-wet printing. Ideal for high-volume print jobs, allowing for longer press runs, fewer interruptions, no screen blockage, fewer misprints and less cleaning. These are opaque inks that produce clean, brilliant colors. Also, WOW inks are Non-Phthalate, gaining international approval from environmental groups. New to this series are our ALLSTAR colors, a group of industry standards.

QMX is a high-opacity, wet-on-wet, versatile mixing system. The system consists of 21 total components: 19 colors plus a clear base and a white base. That is all that's required to mix over 1000 colors. The ink is very soft, smooth and exhibits excellent printing characteristics, while producing a very smooth printed finish. Due to its texture and printability, higher mesh counts may be used, resulting in soft hand finishes. QMX is designed around the PANTONE® color guide. PANTONE® is the world wide guide for graphic artists. It is on all major software systems, i.e. Adobe® Illustrator®, Adobe® Photoshop® and Corel Draw®. Wherever art is generated, PANTONE® colors are likely to be specified.

PVC-FREE WATER-BASED INK SYSTEM

WB-99™ PVC Free Water-Base Pigment Mixing System

WB-99 is a high performance PVC Free Pigment mixing system for 100% cotton light fabrics or dark fabrics when using the discharge process. This mixing system allows the printer to mix thousands of colors using formulas from the M2007 Ink Mixing software.

WB0248 Quick Cure Base

This base is to be used with WB-99 pigments. Mix pigments at up to 10% by weight to create colors

WB0249 General Purpose Base

WB0249 base is used with WB-99 pigments. Mix pigments at up to 10% by weight to create colors. General Purpose Base will not cure as quickly as the Quick Cure Base so take this into account when adding WB-99 PS pigments.

WB0255 Discharge Base

Discharge base is used with pigments. Mix pigments at up to 10% by weight to create dischargeable colors. Test all color mixes for suitability prior to mixing production quantities.

WB0256 Low Crock Binder

This may be added to heavily saturated colors to improve Crock resistance. WB-99 will normally pass industry Crock test standards as is. WB-99 colors will have better crock results after the print ages 24 hours or more.

WB0259 Discharge Agent

Use from 3% to 6% by weight to activate the WB0255 Discharge Base or the WB9067 Discharge White Plus.

WB9067 Discharge White Plus

Discharge White Plus is used as an underlay or stand alone white to enhance the brilliance of colors where garments are not completely discharging. User must add 3% to 6% by weight of WB0259 Discharge Agent to activate the white.

WB0277 JB Soft Crack Natural

WB0277 creates a soft cracked vintage look on 100% cotton light or dark fabrics. Mix up to 30% WB99 PS pigments by weight to create colors. WB0277 must be cured properly to achieve the cracked vintage look.

WB0257 Penetrant

WB0257 is added to WB-99 inks at up to 5% by weight to provide better penetration into certain fabrics thereby giving a softer feel.

WB0258 Lubricant

Add WB0258 at up to 5% by weight to provide more open time of the wet ink to prevent drying in the screens.

WB0510 Thickener

Used at 1/2 to 1% by weight to increase viscosity of WB-99 ink. This would lead to an increase in opacity, but will increase the hand of the print.

Glitter Infused Ink

An attractive, sparkling print effect imparting brilliant prints with excellent durability.

- ✓ Phthalate free, attractive, sparkling print effect
- ✓ Imparting excellent and outstanding brilliant glitter-look
- ✓ Ideal for printing on white and light-colored garments

Florescent Ink (Day-Glow)

For light color fabric outstanding and in-tense color brilliance.

- ✓ Phthalate free, transparent fluorescent ink
- ✓ For light color fabric outstanding and intense color brilliance
- ✓ Inter-mixable with other transparent application

Four Color Process Plastisol Ink

Brilliant continuous tone image & outstanding color strength. Yellow, Cyan, Black, Magenta

- ✓ Phthalate free, significantly large range of color
- ✓ Superior quality four color process plastisol
- ✓ Brilliant continuous tone image/outstanding color strength
- ✓ Performance makes it an ideal

MF-66 Nylon Bonding Agent

is an additive to plastisol inks for printing on shell or treated Nylon substrates. These substrates generally appear in the form of waterproofed jackets.

Retro-Reflective Plastisol Ink

Imparting retro-reflective effectiveness (increasing nighttime visibility)

- ✓ One-part system
- ✓ Light Grey in color
- ✓ Inter-mixable with other transparent colors

Shimmer / Sparkling Metallic Ink

For imparting eye-catching brilliant prints with excellent durability.

- ✓ Phthalate free, imparting an attractive and sparkling print effect
- ✓ Outstanding brilliant metallic jewel ink
- ✓ Ideal for printing on white and light-colored garments

Hexachrome Ink

Brighter, clearer and more accurate color reproduction.

Colors: Hex Green & Hex Orange

- ✓ Phthalate Free,
- ✓ Used for mixing colors
- ✓ Colors are more accurate
- ✓ Brighter and clearer print

Glow-in-theDark Ink

LFP-1007 Glow ink contains maximum levels of phosphorescent pigments that store light energy when exposed to a natural or artificial light source

BLACK AND WHITE INK

Bleed Resistant Plastisol Ink

50/50 Poly/Cotton, Ideal for printing on bleed-prone textile & dark backgrounds. Our most popular ink for screen printing on cotton substrates.

- ✓ Printer friendly
- ✓ Phthalate free, highly pigmented
- ✓ Superb opacity for dark backgrounds
- ✓ Ideal for printing on bleed-prone textile substrates

General Purpose Plastisol Ink

100% Cotton White And Light-Colored Garments

- ✓ Printer friendly
- ✓ Phthalate free, highly pigmented
- ✓ Suitable for heat sensitive fabrics
- ✓ Ideal for printing on bleed prone textile substrates
- ✓ Low bleed property resists dye migration
- ✓ Superb opacity for dark colored backgrounds

Athletic Plastisol Ink

100% Polyester & Nylon Bleed Resistant Ink

- ✓ Printer friendly
- ✓ Phthalate free, highly pigmented
- ✓ Superb opaque for dark-colored backgrounds
- ✓ Best for printing on most bleed-prone textile substrates

High Opaque Plastisol Ink

Consistent high-opaque print result on dark and light colored textiles.

- ✓ Printer friendly
- ✓ Phthalate free, highly pigmented
- ✓ For dark/light-colored fabrics
- ✓ Excellent high opacity (Bleed resistant properties)

Water Based Ink

High elongation water based ink. Use with water based emulsion.

- ✓ Printer friendly
- ✓ 100% biodegradable pigment
- ✓ Water soluble
- ✓ Vibrant colors and super soft feel

MURAKAMI

Photocure BLU

SBQ Photopolymer

A fast exposing pure SBQ emulsion that has the best ease of use of any of the SBQ emulsions. Virtually pin hole and fish eye free, it continues to be one of our most popular emulsions. Exposes well on even low wattage exposure units.

Aquasol HV-HVP

SBQ Photopolymer

Has a higher viscosity for thicker stencils. Fast exposures, and highly durable stencils provides non stop production on press. Use as is for sharp plastisol prints.

Photocure PRO

Dual Core

A dual cure emulsion with exceptional resolution qualities. Photocure PRO images halftones and fine details with ease in an easy to use wide latitude emulsion.

SP-9500

Dual Core Emulsion

Our premier dual cure graphic emulsion. It can withstand the most aggressive solvent ink systems while providing outstanding resolution of fine details.

SP-300 Diazo

Diazo Emulsions

A very durable diazo emulsion that has excellent definition of fine details. SP-300 has excellent water resistance.

BL-901

Red Blockout

A medium viscosity, water soluble red blockout, designed to fill the open areas of the screen that are not covered by emulsion or film. Can be used for masking other designs on the screen until they are ready to be printed.

Available In

Cured Plastisol Ink Removers

Discovery 2011

A highly versatile product that effectively removes the transfer labels in t-shirts & various apparel, as well as cured plastisol ink from t-shirts and fleece goods.

Furthermore, this product is an effective textile stain remover for grease, soil and oil base stains.

caution: use with adequate ventilation. for best results, exhaust fumes using a spot cleaning station (i.e., #80 workhorse)..

Available In

Triple Blend

USED BY: Screen Printers, Garment and Textile Manufacturers

QUALITIES: Non-Flammable, Non-VOC, Non-Volatile Organic Compound that does not add to Smog and Air Pollution. Non-ODS (Non-Ozone Depleting Substance that does not destroy the ozone layer.

PROPERTIES: A Blend of High Grade, virgin, Dichloromethane and Tetrachloroethylene depending on the season of the year, all or none of the following may be added to further ensure stability and clarity: Nitromethane, 1,2 Butylene Oxide.

P.C. Special

Virgin Solvents

Removes

Ink, grease, soil, oil, latex, etc.
Cured plastisol inks
most non-food stains from fabric

Ketone based solvent blend

Ketone solvent odor

Toxicity - maintain below t.l.v.

Very fast dryer

Does not require air testing outside

Cleaners, Spotters and Adhesives Liquids

SUPER-KLEER

TEXTILE NEEDLE OIL

Sewing Machine Oil / General Purpose Textile Oil

Not diluted or cheapened with Mineral Spirits or any other chemical. 100% Pure - Guaranteed.
WATER WHITE / NON-STAINING

DESCRIPTION

SUPER-KLEER #22 is a highly refined, high viscosity index, mineral oil that gives excellent lubricating performance where rust, oxidation and/or high bearing and gear loading are not problems. Unsurpassed as a textile needle oil, it is not cut with any low grade diluents.

APPLICATIONS

Textile Needle Oil and general purpose textile oil where high standards are mandatory
Light Duty Hydraulic Systems
Plain and Anti-Friction bearings
Spur, helical and bevel gears operating under moderate loads

Machine Oil Equipment Features / Benefits

Good water separation
Very good oxidation resistance
Gravity *API = 33.5
Viscosity @ 40 degrees C.cSt = 11.5-14.5 & 100 degrees C.cSt = 3.10 typ
Viscosity Index = 78
Flash Point COC F = 350
Pour Point F = 117

BULK LIQUIDS

2250

Stencil Remover

A Quick and convenient solution that dissolves water-resistant emulsions from screens.

820

Press Wash and Opener

Works quickly and efficiently on Plastisol inks to open dried or clogged screen images during production runs. It evaporates fast without leaving any solvent residue on the screen, so re-taping screens is fast and easy. It is also ideal for quickly washing the screen after press runs and color changes.

855

Ink Degradant

Natural ingredient-based formulation to remove Plastisol ink from both water resistant and pure photopolymer type stencils without any softening or damage to the stencil. 855 has excellent emulsifying and degreasing properties.

857

Haze Clean

A pH Neutral and highly effective cleaner engineered to quickly remove stubborn ink and stains aggressively from printing mesh.

CHEMICALS

BIO-1

Ink Remover & Degreasers

It's called #1 for a reason, the most powerful ink remover, stain remover and degreaser on the market today. Works great on textile and graphic inks. Great bubblegum scent. Low VOC. (PIF# 01459)

ProTex

Press Side Wash-Up

Use for wash-up, color change, and as a pre-step for color change. Safe even on fast emulsions. (PIF# 01467)

Complete Ink Remover

A super fast acting, one step product that removes ink, block out, emulsion and capillary film from the screen all at once.

ProWipe

Press Side Wash-Up

For use after the run to prepare the screen for reclaim. Aggressive on most inks. (PIF# 01477)

KOR-CHEM

ER-188

Emulsion Remover

Full strength emulsion remover. Ready to use, no dilution necessary. (PIF# 01481)

ER-130

Emulsion Remover

An extra concentrated emulsion remover formulated for fast and easy removal of diazo, photo polymer and capillary film emulsions. (PIF# 01453)

ProClean

Haze Remover

For textile printers there is no contest – ProClean is the best. It's a haze remover, degreaser and clarifier all in one. If you print fabric, ProClean's your answer. (PIF# 01474)

GIR-4U

Ghost Image Remover

A thick, biodegradable haze remover. Works in less than 3 minutes. Easily reclaim screens with troublesome old images, squeegee or flood bar marks. (PIF# 01500)

Bean-e-doo

Screen Washes

Cleans screens quicker, easier, and without the hassle other harsh, even bio-solvent, cleaners require. The first thing that users notice is there are NO offensive odors like traditional solvents.

Wash-Away

Screen Washes

It cleans the full array of inks. This non-evaporative cleaner is great for recycling and/or wash tanks. You don't have to say "tanks, guys," just order to make your ink removal "clean and simple."

Color Change

Screen Washes

Makes this color changes easier without using harsh chemicals such as toluene or xylene. Color Change cleans effectively without the dangers and environmental impacts of traditional solvents.

d-Grease

Screen Degreaser

multi-surface cleaner, d-Grease can even be used to clean the glass on light tables. It will work great when reviving the tackiness of water based pallet adhesives.

One Step Clear

Screen Washes

This one process is more efficient and economical at removing traditional plastisol inks and emulsions. One Step Clear is 100% biodegradable and non-toxic, making it safe for continued use. It is also a non-flammable, low odor solution that has a shelf life of 4-6 months.

Greeneway

Screen Washers

GREENEWAY™ is a biodegradable, non-hazardous solvent, ideal for replacing mineral spirits. It causes less wear on emulsions and will not loosen tape. Best of all, a little goes a long way. Mix 50/50 with water and clean most inks in large wash tanks.

Stripe-e-doo

Emulsion Removers

Removal is made easier with this natural and biodegradable chemical. Strip-e-doo is designed specifically to penetrate and completely dissolve any and all types of emulsion and capillary film, without weakening the screen mesh.

d-Haze

Haze Removers

a safe and eco-friendly alternative that really works! Unlike traditional ghost removers, d-Haze will not damage your mesh no matter how long it is left on.

Ickee Stickee

Pallet Cleaner

Removing adhesive build-up from pallets is a hassle. Ickee Stickee Unstuck can quickly eliminate the "sticky" mess on your pallets as well as other surfaces around your shop.

Available In

SPOT LIFTERS

Stain-B-Gone 1

20oz Aerosol | 12 cans to case
The Ultimate spot remover for bedding, carpet and textile. Dries fast and is a powerful non-flammable solvent.

Stain-B-Gone 2

20oz Aerosol | 12 cans to case
A very fast acting formula that removes stains and is non-flammable. Cleans on contact and will not leave any residue.

Pull Out 2

20oz Aerosol | 12 cans to case
This product removes the "ring" that sometimes appears in the garment after the initial stain has been removed.

Pull Out 3

20oz Aerosol | 12 cans to case
Premium grade circle and ring remover. Eliminates grease and oil stains and is safe on all fabrics! No Chlorinated Solvents.

Pull Out Premium

20oz Aerosol | 12 cans to case
An amazing version of our Pull Out series but does not contain any Chlorinated Solvents!

REMOVE OIL & GREASE STAINS...FAST! - 50 State VOC Compliant

From Scotty Barocas, President

Folks, my family has been in the stain removal business for 46 years and never, never have we seen the perfect product - until now! I ask you to try a can and if you don't "love it", I will personally refund the \$8! PULL OUT ULTIMATE will get you out of hundreds of jams. Works great on re-works & stragglers too. Call me personally 800-241-7708 ext. 105 or email scott@ancfirst.com. NO PERCHLOROETHYLENE OR CHLORINATED SOLVENTS. DEALERS WELCOME

Turns to a powder,
stain rises to the top,
blow out residue!

Tee Wipes

Wiping Cloths
7x14 Approx. 2,000 Per Case

QUICK RIP TAPE

Used for taping off registration marks and pinhole leaks, PMI QuickRip Blockout Tape is a blue, non-adhesive tape that can be torn by hand and removed easily without breaking or leaving residue behind.

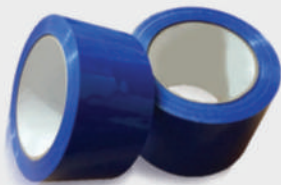

2" wide x 60 yd roll.

6969 Wipes

Wiping Cloths
13x13 Quarter Fold 900 Per Case

Blue Blockout Tape

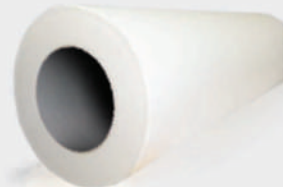

Self wound polyethylene with an aggressive adhesive. Resists attacks by inks and solvents. Conformable & easy to apply. Clean removable from wood frames & mesh with no adhesive residue.

2" x 36 yards | 36 rolls per case

3" x 36 yards | 24 rolls per case

Pallet Tape

Never clean your platens again! Save hours of messy and unhealthy cleaning with solvents. Cover your clean platens with Pallet Tape, then when the build-up of lint and a dhesive becomes excessive, simply peel off and replace.

16" x 100 yards | 3 rolls per case

20" x 100 yards | 2 rolls per case

Big Shop Wipes

Blockout Pens

Fast drying, water soluble Blockout Pen is used to fix pinholes on screens, with no need to take screen off press. Blockout pen even works upsidedown!

Split Tape

Blue areas do not contain adhesive allowing Split Tape to peel cleanly without leaving residue, tearing, or damaging your emulsion. For masking the inside of rigid aluminum, roller and wood frames.

CFC Foam & Rubber Cutting System

CFC-M (motor only)
(with power cable and on/off switch)

Blades

Standard
(column)

CFC-B
Base

NOT
included
with
motor.
(Available
Separately)

COMPONENTS AVAILABLE SEPARATELY:

BASE:

CFC-B - Base only - for all size machines

DUAL MOVABLE BLADES:

(Sold in sets only - 2 blades)

CFC-BL3 - 3" (70mm), CFC-BL5 - 5" (130mm),
CFC-BL8 - 8" (200mm), CFC-BL12 - 12" (300mm)

STANDARD (COLUMN):

CFC-C3 - 3" (70mm), CFC-C5 - 5" (130mm),
CFC-C8 - 8" (200mm), CFC-C12 - 12" (300mm)

The CFC is a foam and rubber cutting system in which all the components are sold separately.

- 1: The CFC-M Motor unit is the electro-mechanical body of the system
- 2: The CFC-B Base has rollers for smooth cutting. The column and blades are attached between the motor and the base.
- 3: Select whichever length (or lengths) of Column (standard) and Twin Blades desired.

CFC Foam Cutter - continued on page 2

With this system, you can not only have the cutter size you need for one size of cutting, but you can also have more sets of Columns/Blades and switch your CFC cutter size in a matter of minutes. It is much safer and easier to use the cutter length appropriate to the material thickness you are cutting. The CFC System allows you to have up to four sizes using the same CFC-M Motor and CFC-B Base.

MB-50-C 2" Cutter

Lightweight yet powerful rotary shear with 7-Sided High-Speed Steel Blade

The **MB-50-C** is a lightweight yet powerful rotary shear that lets you cut fabric with incredible ease and accuracy. The MB-50-C is excellent for narrow curves and sharp corners. For cutting single and low lays of material including cloth, knitted fabrics, plastics, synthetics, leather, lace, fiberglass, vinyls, etc. Use for slitting and trimming knitted fabrics when base plate is removed. Durable and easy to maintain and lubricate.

501P Heavy Duty Portable, Battery Operated Rotary Cutter

Complete with heavy duty NiCad Battery Pack and temperature controlled Quick-Charge Charger

503K PORTABLE ELECTRIC ROTARY SHEAR

Model 503K is a lightweight yet powerful rotary shear (scissor action) that lets you cut fabric with incredible speed. It comes with built-in sharpener and safety features. The 503K is excellent for narrow curves and sharp corners. For cutting single and low lays of material. Used for slitting and trimming knitted fabrics when base plate is removed.

515E

High Speed Stand-Up Type Round Knife Machine

Blade Size 3-1/2" (90mm)
Cutting Depth, Max. 11/16" (18mm)
Weight 4 lbs. 10 oz. (2 kg.)
1/10 HP Universal type series motor
AC/DC 115 volts (220 volts available)

515E gives you the fast and accurate operation of a larger machine in one that is lightweight and effortless to operate. This machine is designed to cut all types of patterns and is capable of handling slippery or synthetic materials singly or in multiple plies. Comes with finger guard and built-in sharpener.

STRAIGHT KNIFE CUTTING MACHINES

918 Series

With extraordinary power and unparalleled efficiency the CONSEW 918 series straight knife cutting machines are designed with maximum durability. The 918 is capable to cut through heavy material or an increased ply.

The 918 series is available in sizes 6", 8", 10" and 12" models and uses commonly available knives, abrasive bands and most parts made for the Eastman Brute. All Consew products are made to the highest quality standards.

Terms and Conditions

UPS SHIPMENTS: Orders to be shipped that are processed before 3:00 p.m. EST will be shipped in most cases the same day. Any orders placed after that time will be shipped the next day.

FAXED ORDERS: Faxed orders are encouraged. The same guidelines that are set up for other orders will be in effect for fax orders (i.e. delivery times, UPS shipments, etc.). If any questions should arise regarding a fax order that you have sent, a customer service representative will contact you.

E-MAILED ORDERS: E-mail orders to mike@american-niagara.com. We understand that these policies may need to be adjusted. Due to the nature of our business, there are times when a product must be received immediately. If this situation arises, please inform our staff and we will do our best to meet your needs. Thank you for your cooperation!

RETURN POLICY: Return item(s) will not be accepted without a Return Authorization Number (RA-#). Please contact customer service to obtain this number. Returns must be shipped freight pre-paid. If a freight collect shipment is refused, we will invoice you for all freight charges that are incurred. All returns must be made within 30 days of invoicing and are subject to a 15% restocking charge. All special orders are non-returnable. Any returns as a result of our error are exempt from any restocking & freight charge but still require an RA#.

BACK ORDERS: Orders are normally shipped within 24-hours of placement. On occasion however, a product may be temporarily out of stock. If we ship your order incomplete, we will place the out of stock item on back order and ship it when we receive it. You will be notified of back orders and at that point will be able to decide to wait or receive a substitute item. Please advise our customer service department if you will not accept back ordered items.

TECHNICAL SUPPORT: Free technical support is available by calling 1-800-241-7708 during regular business hours, or by e-mailing us at mike@american-niagara.com. We will reply to email questions promptly. If you're needing assistance concerning any product we sell, just give us a call, we'll be glad to help.

DISCLAIMER: Our technical advice, product recommendations, and services are based on information which is believed to be reliable. This information is intended for use by competent persons who will utilize their own judgment at their own risk. American Niagara / Tee Squares cannot be held liable for undesirable results obtained or for damages incurred by use of our advice, recommendations or services; in whole or in part.

PAYMENT TERMS: We accept the following credit cards: American Express, Visa, and Mastercard. We offer terms of - Net 30 Days to those customers who have filled out a complete credit application (available on request) and have received approval from our credit department. We also offer COD Payment.
